

Dear FCC Staffers:

I am an avid listener and support of XM satellite Radio. The technology is very useful to my daily life, and I would like to continue to utilize XM or any competing Satellite style radio to get updates on News, Sports, Weather, Traffic, etc.

I respectfully ask you to reject the NAB's petition 04-160 and to support and continue to support innovative technologies like XM radio's abilities to expand markets and bring consumers what they want...a great quality radio product!

In closing, I have been outargued at the "bigger is better" policies towards the FCC's continual support of "mega mergers" for all media companies, and hope you will all be looking for work after next January! You are a disgrace to a free America.
